

TITANIUM CONSTRUCTION GROUP

WHERE INNOVATION
MEETS DURABILITY

ABOUT US

Titanium Construction Group is a full-service construction company delivering high-quality interior and structural work across Ontario. We operate with professional project management, clear scheduling, and strict quality control — ensuring every phase is executed efficiently, safely, and to code.

Wood & Steel Framing

We handle wood framing and steel stud framing for custom homes, renovations, and commercial fit-outs — with accurate layout, straight lines, and solid structural tie-ins.

Drywall, Mudding & Firestopping

From board installation to clean taping and finishing, we deliver smooth, consistent walls and ceilings. We also complete firestopping and firecaulking where required to meet code and inspection standards.

Interior Finishes & Installations

We take projects through to completion with full interior finishes, including painting, flooring, tiling, finish carpentry, and final installations — with clean details, durable materials, and a polished final look.

17 UNITS
RENOVATION

MISSISSAUGA

3151 JAGUAR VALLEY DR

PROJECT DESCRIPTION

MAJOR SCOPE

Titanium Construction Group completed a full renovation of a 17-unit building, delivering a complete interior transformation with upgraded layouts, new finishes, and code-compliant assemblies throughout. The scope included full coordination of trades, scheduling, quality control, and inspection readiness at every stage to keep the project moving efficiently and professionally.

FULL GUT CONVERSIONS 5 GARAGE UNITS

Five units were converted from garages into fully livable residential suites. Work included complete demolition to structure, new layout and partitioning, new framing (stud systems), and full mechanical/electrical coordination to match the new floor plans. The conversion work was executed as a true “from shell to suite” rebuild—everything was newly constructed and installed.

INTERIORS FINISHES

All units received new drywall installation, taping/mudding, and firecaulking as required by code. Final interior packages included new kitchens, new bathrooms, painting, flooring, and new baseboards/trim. Every component was delivered to a clean, client-ready finish with consistent detailing across the building for a uniform, premium result.

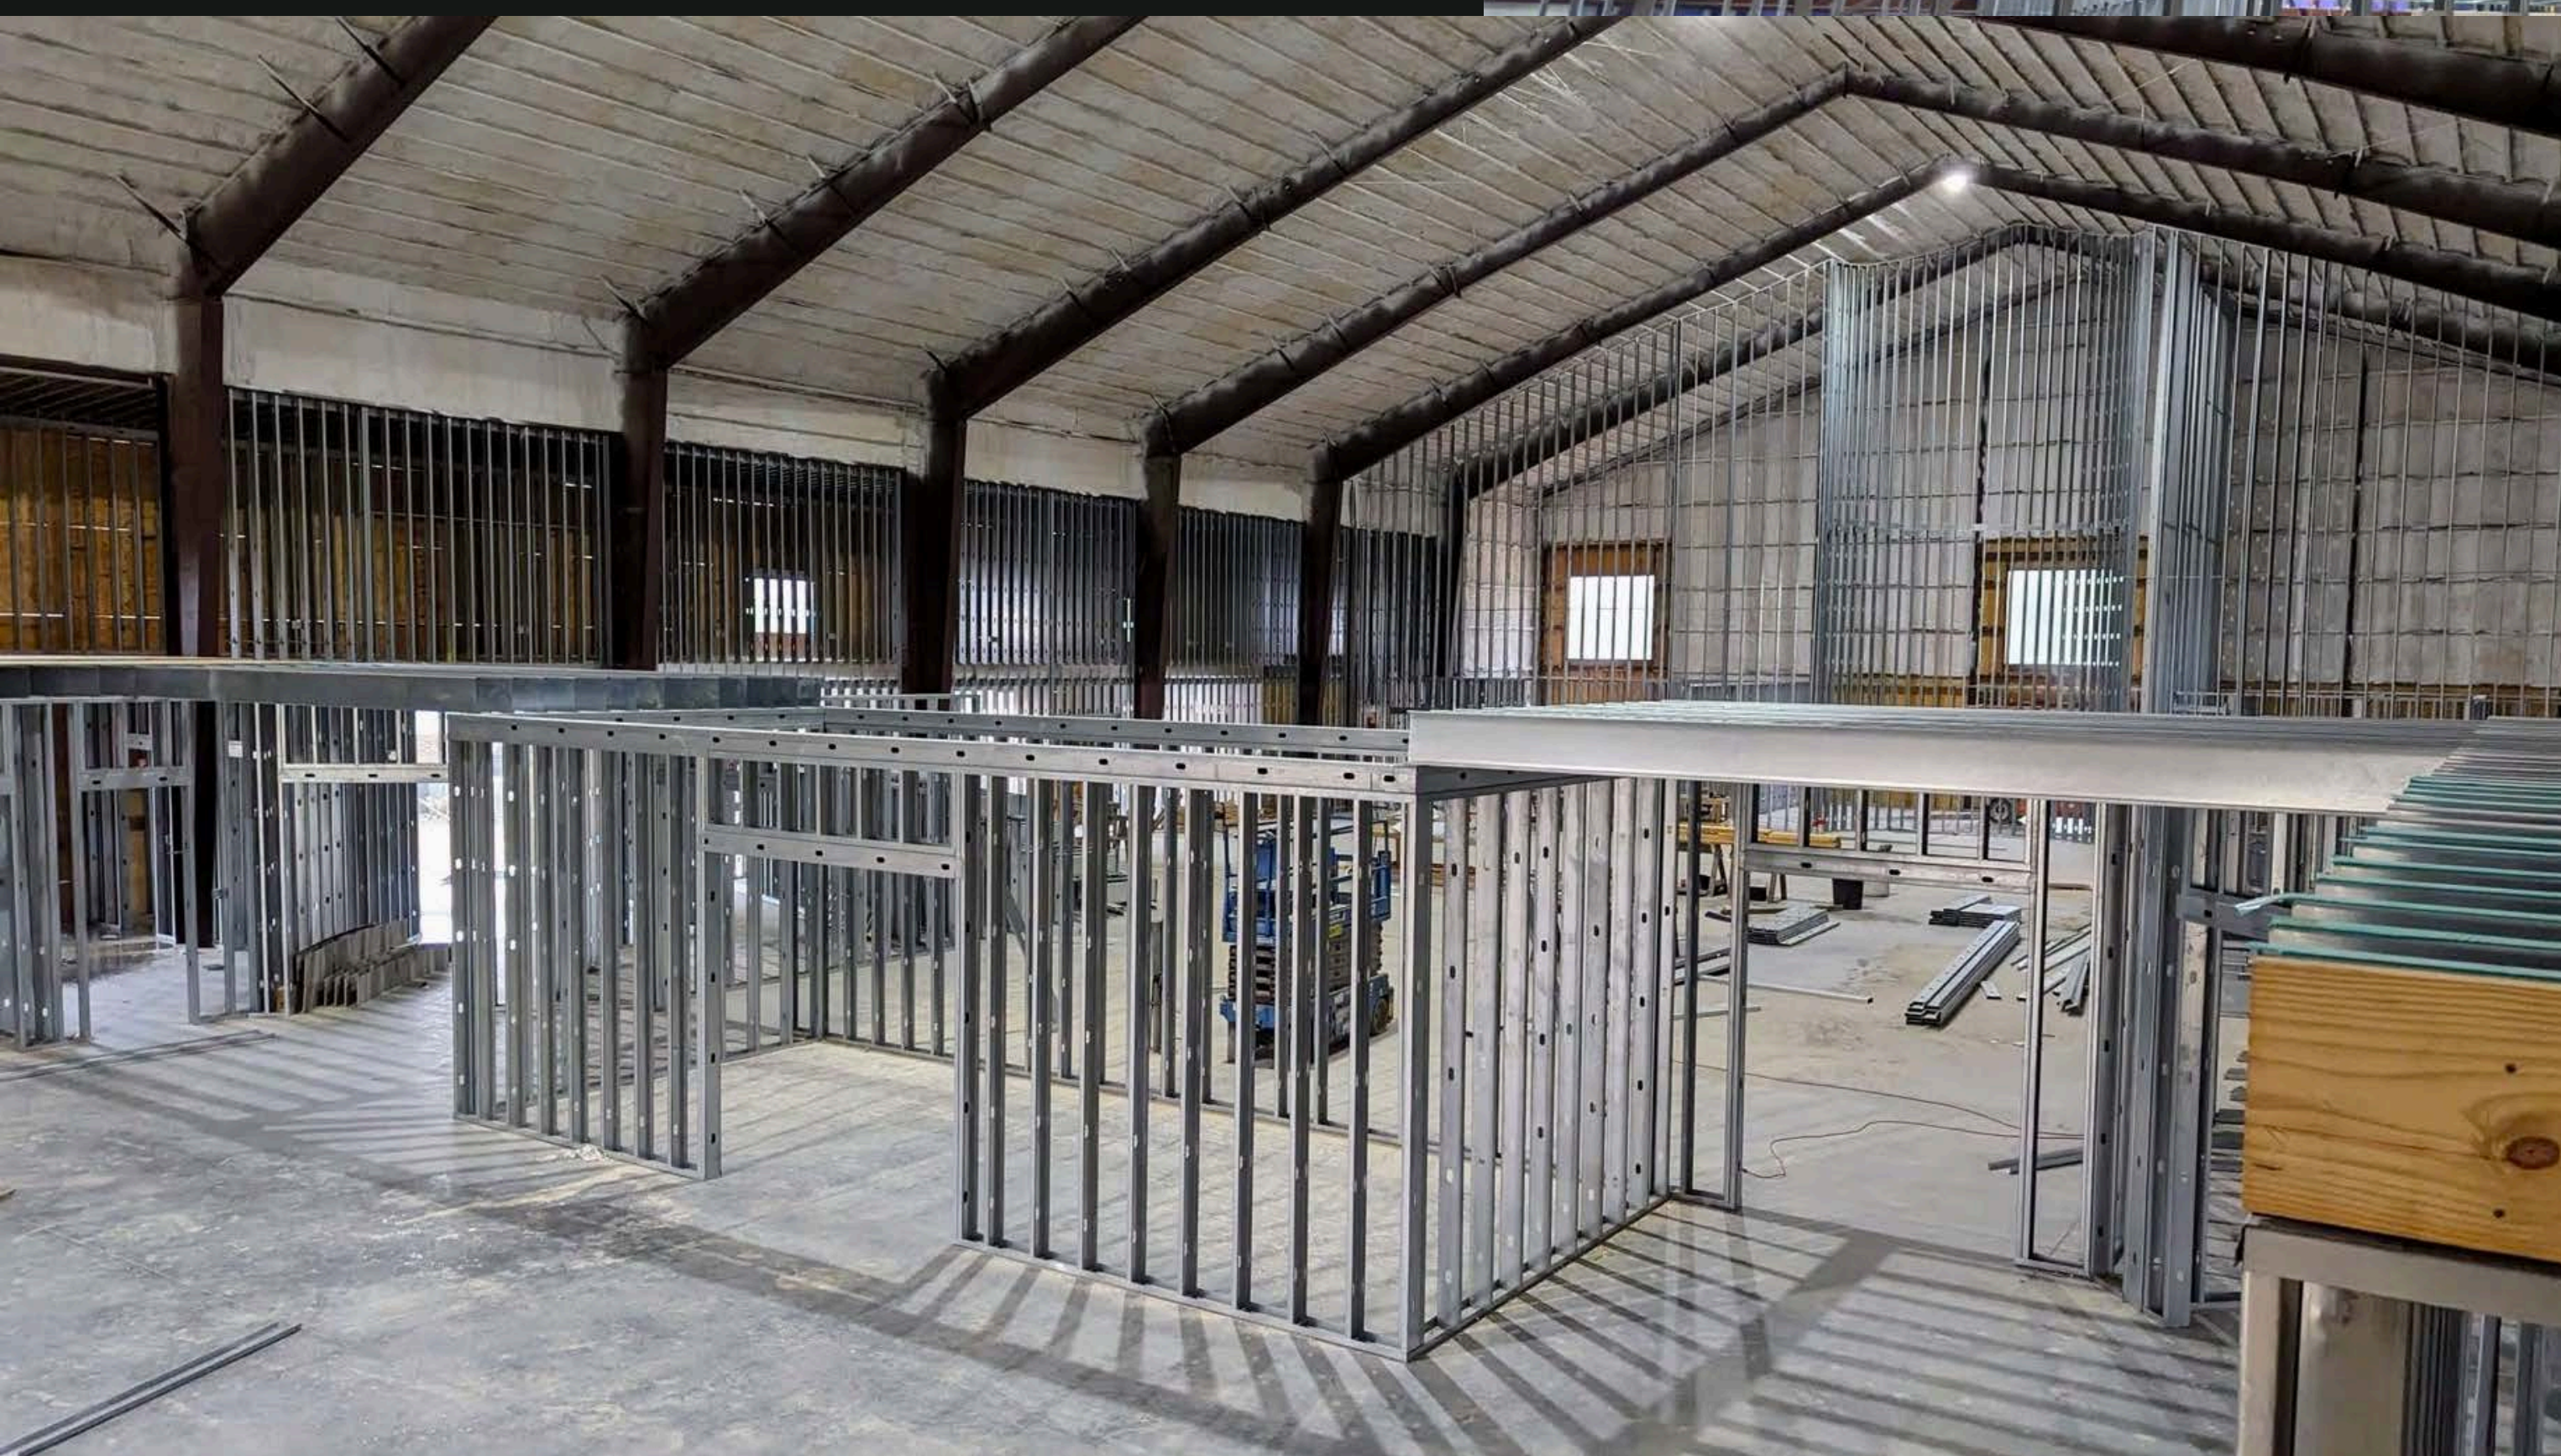

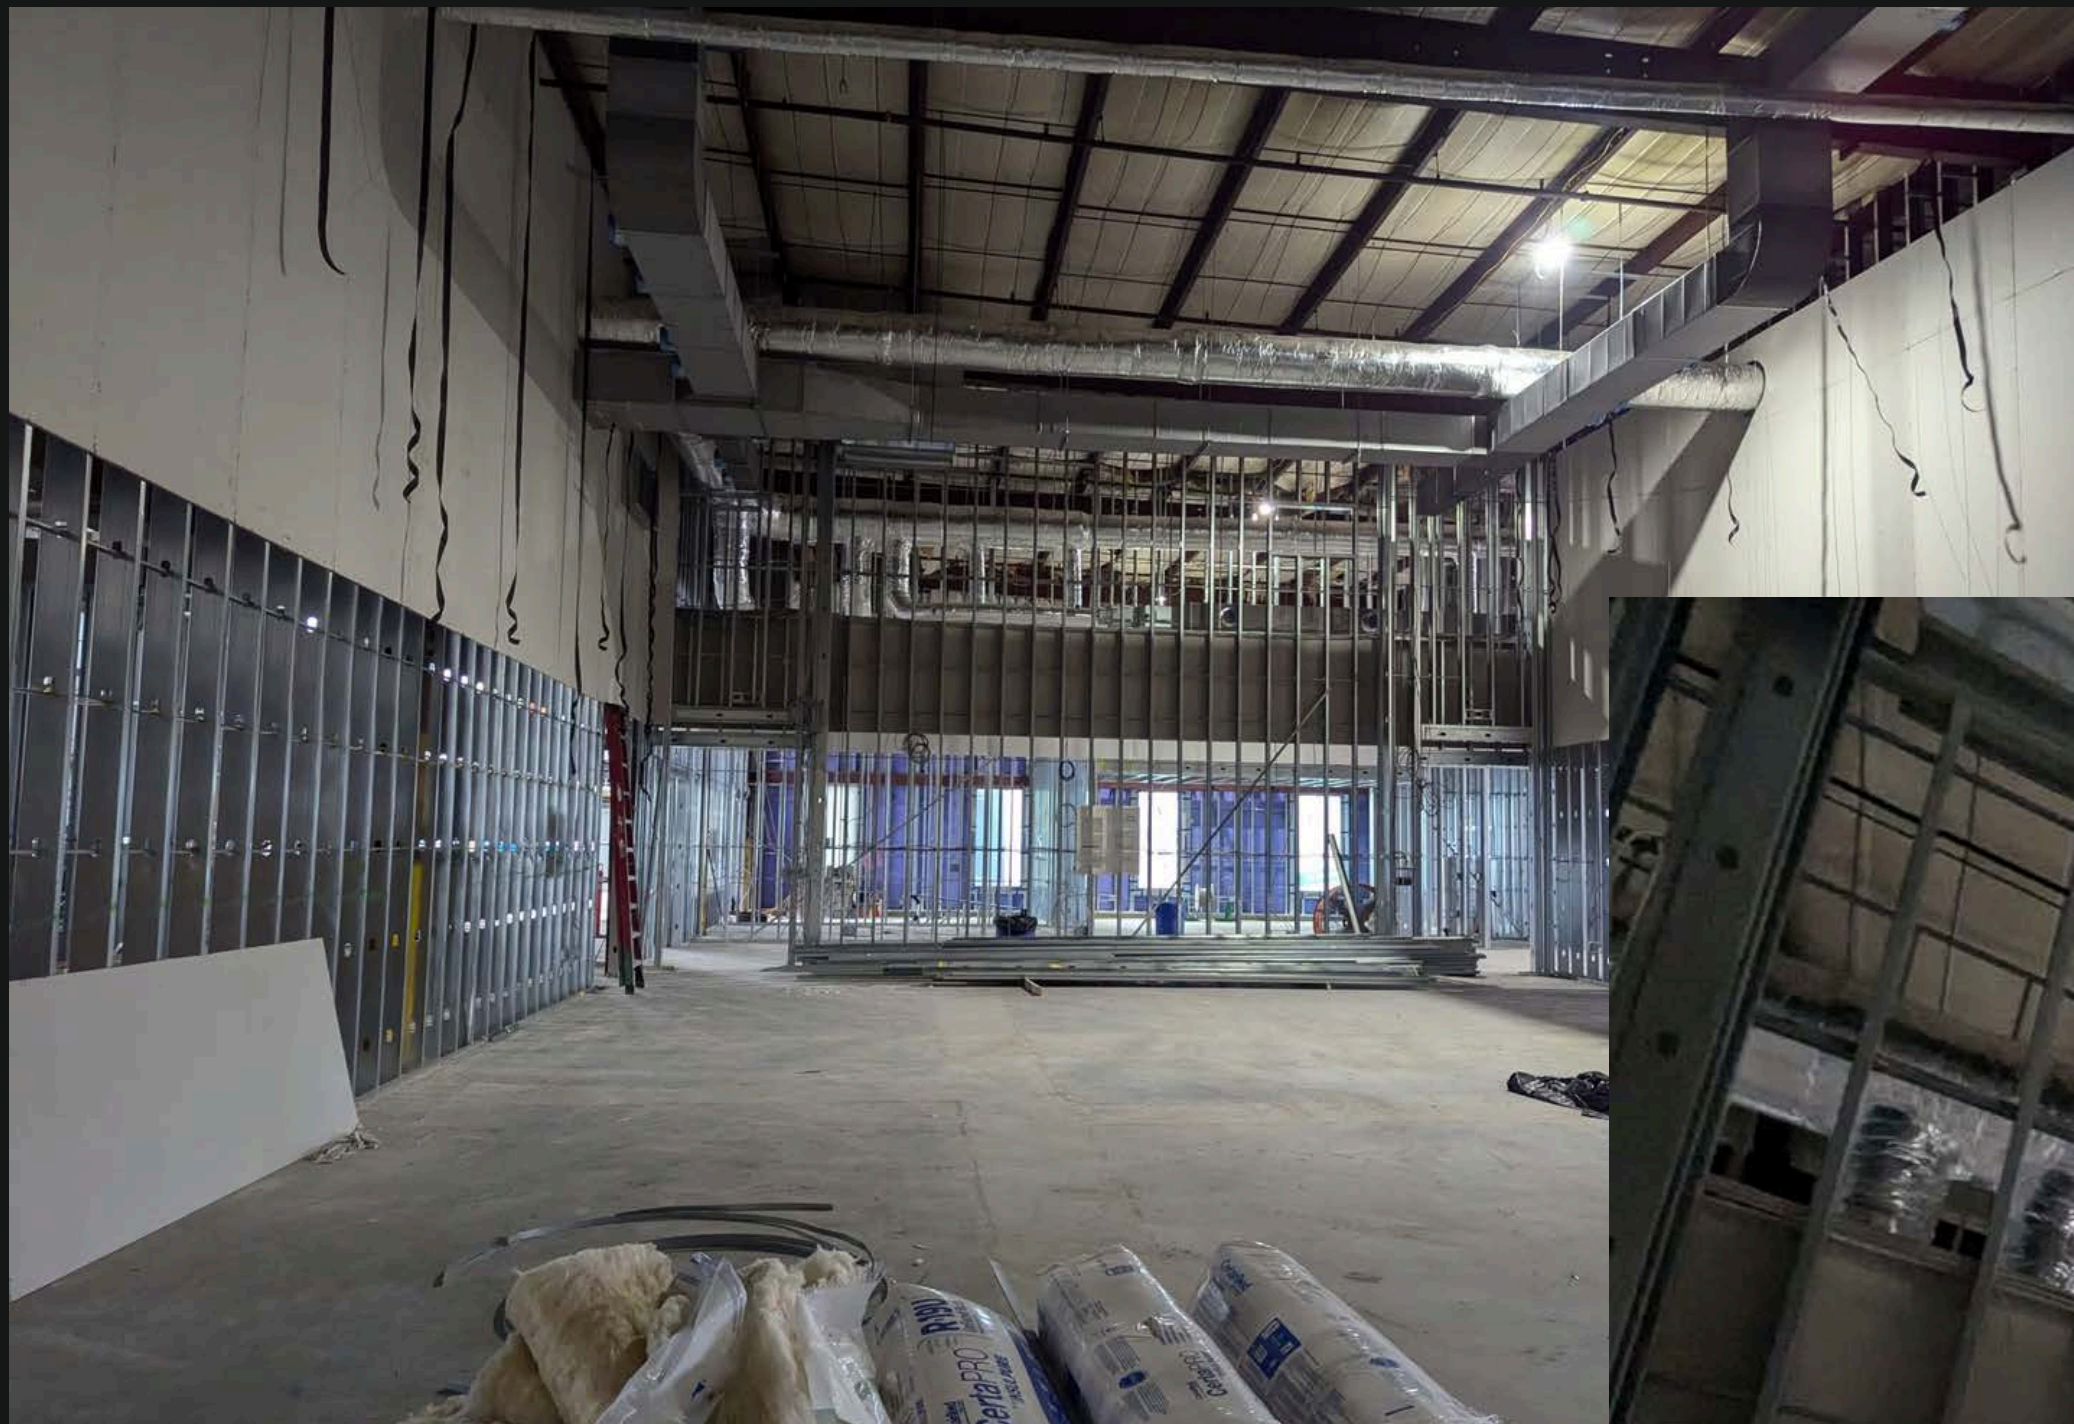

Quality control was managed through each phase to ensure smooth approvals and zero rework. All inspections were successfully passed on the first attempt, including framing, drywall, firecaulking, and final. The result was a fully renewed building delivered with professional execution, clean documentation, and a high standard of workmanship.

PROJECT OVERVIEW

OUR SCOPE

Titanium Construction Group completed a full interior build-out package for a warehouse space, delivering light-gauge steel stud framing, drywall installation, and Level 4 taping/mudding to achieve clean, paint-ready surfaces. Our scope included layout and installation of new partition walls, framing for openings and transitions, and required backing/blocking to support future finishes and equipment. Work was coordinated around existing structure, ceiling heights, and mechanical systems (including ductwork) to maintain clearances and keep the project moving efficiently. Throughout the process, we maintained an organized site, consistent quality control, and inspection-ready workmanship from framing through final sanding and finish prep.

OUR SCOPE

Titanium Construction Group delivers complete interior finishing packages designed to bring spaces to a clean, high-end final result. Our finishing scope includes professional painting, detailed drywall prep (Level 4/5 where required), flooring installations (LVP, laminate, engineered hardwood, and tile), full tile work for bathrooms and feature areas, and precision finish carpentry such as baseboards, trim, doors, and hardware. We also offer modern specialty finishes like microcement for seamless, durable surfaces on walls, floors, and shower areas. From millwork and cabinetry installation to final fixtures and accessories, we coordinate the last stage of the project with strict quality control so the finished space looks consistent, polished, and client-ready.

We also offer modern specialty finishes like microcement, delivering seamless, durable surfaces for walls, floors, showers, and architectural feature elements — ideal for contemporary, high-end interiors. Finish carpentry and installations are handled with precision, including baseboards, casings, doors, hardware, shelving, and accessories, along with millwork and cabinetry installation for kitchens, vanities, and built-ins. The result is a final product that looks consistent, refined, and professional — with every detail aligned, sealed, and finished to a client-ready standard.

OUR SCOPE

Titanium Construction Group delivers complete build-outs and renovations across a wide range of spaces, including kitchens, bathrooms, basements, and full-home interiors, as well as commercial offices, warehouses, retail units, and multi-residential suites and common areas. Whether it's a single room upgrade or a full unit transformation, we handle the process from framing and drywall through final finishes and installations—creating clean, functional layouts and durable, professional results that are ready for occupancy and inspection.
